DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/01/10 has been entered.

Claims 2,4,7 and 8 are cancelled. Claim 9 is added. Claims 1,3,5,6 and 9 are pending and under consideration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The rejection of claims 1,3 and 5-6 under 35 U.S.C. 103(a) as being unpatentable over Yoon, 2000; IDS) in view of US **5,976,567** (published 11/02/1999) and further in view of (Martino et al, 1996; IDS) is withdrawn in light of Applicant's amendments to the claims that now limit the method to a non-obvious and unpredictable result.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Yoon, (2000; IDS).

Claim 9 is directed to a vitrified human oocyte produce by the method of claim 1.

Claim 9 is a product by process claim in which the process of creating the oocyte carries little patentable weight. It is only the product, which is anticipated by the prior art and not the process by which the product was made. This is because the final product (the vitrified human oocyte) is not distinguished by any particular features or characteristics resulting from the process by which it is made. As such, the limitations of the claimed oocyte are met by any human vitrified oocyte in the prior art. Patentability of a product-by-process claim is determined by the novelty and nonobviousness of the claimed product itself without consideration of the process for making it which is recited in the claims. *In re Thorpe*, 227 USPQ 964 (Fed. Cir. 1985).

Yoon taught exposing mature human oocytes to cryoprotectant prior to loading onto an electron microscope grid. The grid was plunged into liquid nitrogen and stored in liquid nitrogen until vitrification (paragraphs 3 and 4).

Thus, the teachings of Yoon anticipate the limitations of claim 9.

Conclusion

Claims 1,3,5 and 6 are allowed.
